Development Services

01

Business Analysis

We analyze business needs and offer the best solution for our Clients.

02

UI/UX & System Development

We create seamless and efficient user flows.

03

Testing & QA

Our goal is to make our products work without failure.

04

Maintenance & Data Analytics

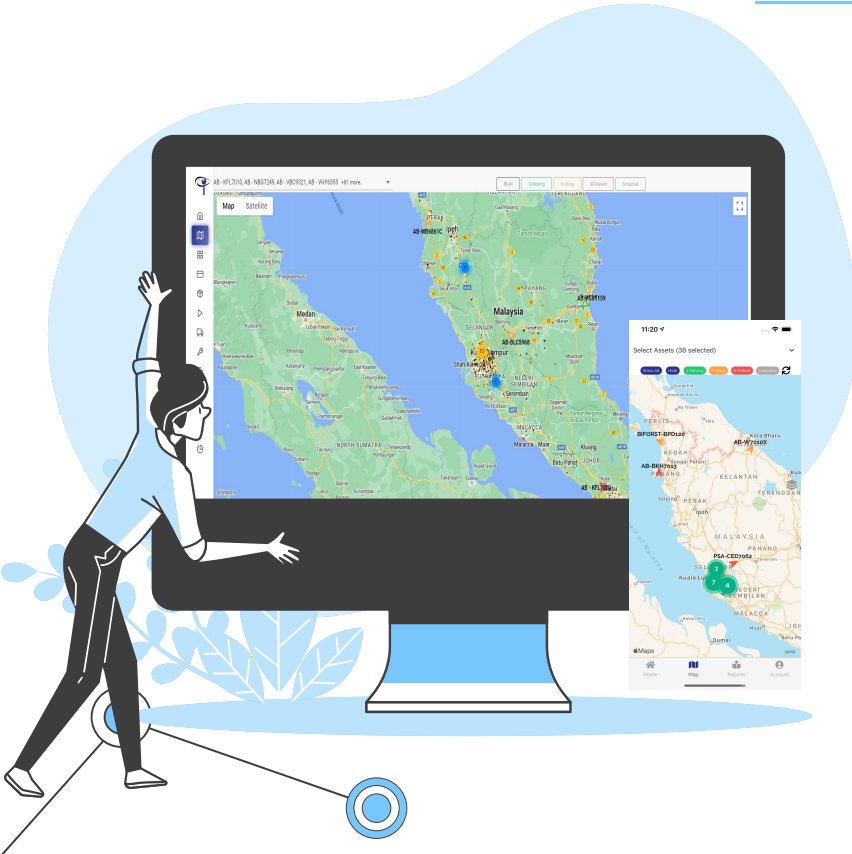

We assist in deployment, scaling and maintenance of applications & managing business data.

Our Projects

Igeotechgps

[Web Portal](#) | [Android App](#) | [iOS App](#)

Business Challenge & Solution

~ Igeotech is a telematics service provider with over 3000 gps tracking units all over Malaysia for fleet tracking (location, fuel, temperature, etc) & fleet maintenance.

~ Their existing solution from China was not sustainable due to reasons such as dependency on multiple softwares for different features, high subscription cost, not customized for Malaysian markets, lack of IP (Intellectual Property), etc.

~ Our team took a deep dive to understand Igeotech pain points & opportunities and built an integrated solution within 11 months.

~ Our solution consists of a IOT backend to manage data transfer from trackers & sensors with different brands / protocols like TCP, UDP, HTTP to sanitize & store data with Redis & PostgreSQL databases.

~ Web & mobile apps (including Huawei) with features such as Trip Playback, Live View, Sophisticated Reporting, Alarms, Telegram Integration, Fleet Maintenance, Tire Dashboard, Cost Analysis, Driver App, Auto Trip Management were developed.

DBC Physiotherapy

Web Portal

Business Challenge & Solution

~ DBC is a allied health & physiotherapy chain using technologically advanced tools for efficient and effective outcomes, such as via gamification therapy or progress tracking and report generation.

~ DBC's patient recovery documentation were paper based & disconnected from QR based exercise machines leading to reduced therapist productivity, multiple sub-par software systems with no integration & little to no patient engagement.

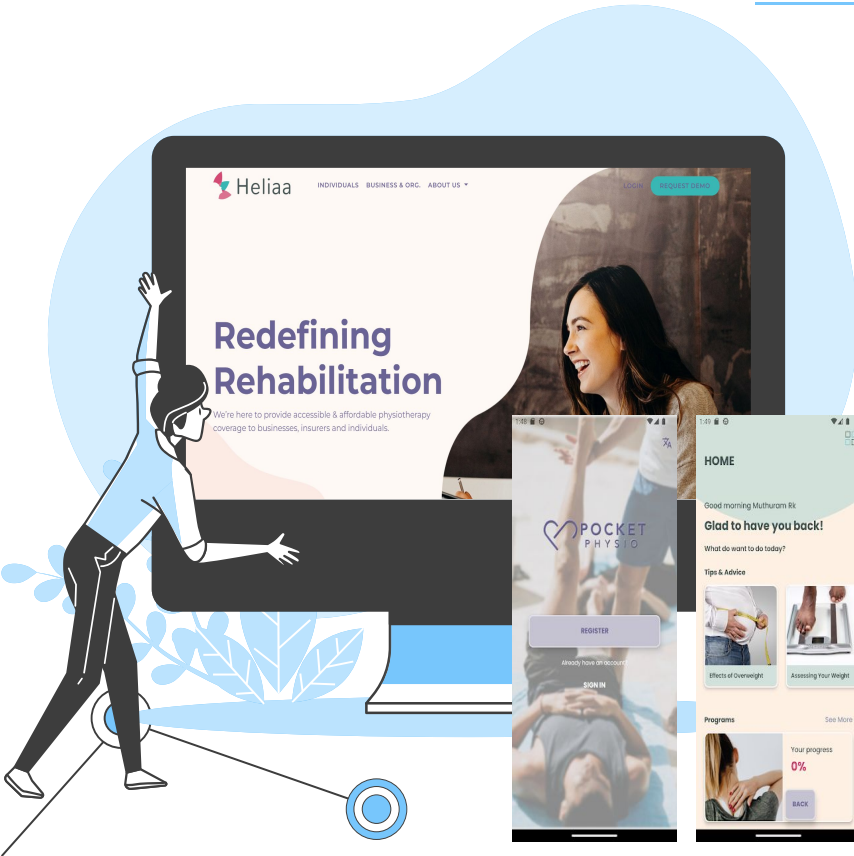

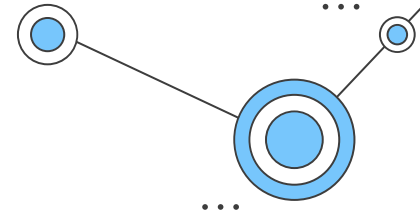

~ Our solution consists web portal for members with reporting, booking management, notifications with added Health Dashboard & BMI monitor for patient engagement.

~ Main component of our solution is the Smart Physio portal which encompasses almost every aspect of therapist management such as Human Resources, Staff KPI & Performance, Scheduling & Roster Management, Smart Patient Assignment & Recovery Management.

~ Apart from this our team has engaged with DBC management to perform continuous data analytics to improve sales & staff performance.

Heliaa Digital Rehabilitation

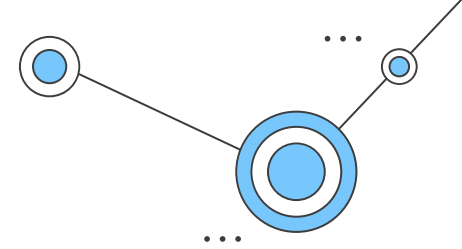

[Web Portal](#) | [Android App](#) | [iOS App](#)

Business Challenge & Solution

- ~ Heliaa is a fully digital rehab application to assess MSK risks digitally and provide AI-driven Rehabilitation Programmes targeted to resolve pain in concerning areas
- ~ Our mobile app solution contains in-app Video Teleconsultation, Payment gateway (Stripe & E-GHL), Push notifications, digital MSK Assessment, smart Recovery Program assignment and reporting.
- ~ Corporate users have a web portal to add staff profiles & manage their recovery progress thru dashboard & ROI reporting.
- ~ Therapist & Heliaa management perform their operations thru a Administrative web portal which has Human Resources, Administration, Operations with web Teleconsultation for cross platform video calls.
